Browbeating Witnesses.

The law is charitable. It presumes that all men will do their duty, and it holds every man innocent of an alleged crime until he has been proved guilty. Lawyers, on the contrary, are inclined to be uncharitable, especially toward witnesses who testify against their cli-

Though they have sworn "to tell the truth, the whole truth, and nothing but the truth," the opposing counsel usually takes it for granted that they will go as near committing perjury as their fears

will permit.

Doubtless, there is much to be said in justification of the lawyers' course. They see much of the prevarication of witnesses, and many attempts to conceal one fact, or to exaggerate another. It is not strange, therefore, that they should doubt the truthfulness of any witness, when interested in a cause and a majority of witnesses are partisans.

Their skepticism is often made offensively prominent in a cross-examination. The lawyer's manner says, "You have sworn to a lie and I know it, and the jury shall know it, too, before I'm done with you.

Then he puts a series of questions for the purpose of disconcerting the witness, so that he may contradict himself and thus spoil his evidence. If the questions fail to effect the purpose, then they are reinforced by browbeating.

Daniel Webster once tried this method upon a clergyman's wife, Mrs. Greenugh, of Newton, Mass., a self-possessed and majestic-looking woman.

The question before the court was that

of a Mrs. Badger's coundness of mind, she having made a will during her last sickness. Mr. Webster, who had been retained by those who were trying to break the will, saw that the testimony of Mrs. Greenough, she being a witness for the opposite side, would have great weight with the jury. He reasoned, therefore, to spoil her evidence if he He began his cross-examination by

putting a certain question, which Mrs. Greenough commenced to answer by saying, "I believe"— "We don't want to know what you be-

lieve, madam," roared Webster; "we want to hear what you know." That was what I was about to say,"

replied Mrs. Greenough, going right on with a clear answer to the question. Again and again, Mr. Webster, seeing the effect of her evidence upon court and jury, tried to embarrass her.

At length, irritated by his failure to ruffle the self-possessed witness, he sprang to his feet, drew out his snuff-box, took a pinch, and, holding a large bandana handkerchief to his nose, blew soncrous blast. "Mrs. Greenough," he asked, while

the report was vibrating, looking sharply at her, "was Mrs. Badger a near woman?" "I can't say as to that, sir; she had

one very dirty trick," "What was that?"

"She took souft,"

The Court House shook with peals of laughter from Judge, jury, ber and spec-

When They Died.

A fraction more than one-third of all the Presidents of the United States (not counting the two ex-Presidents now living nor President Garfield) have died in the month of July. Those who met their fate in this month were Jefferson and Adams (July 4, 1826), Monroe (July 4, 1831), Van Buren (July 24, 1862), Taylor (July 9, 1850), Johnson (July 31, 1875). Four others—Madison, Jackson, Polk and Buchanan—died in June. In those two months, therefore, exactly half of all the Presidents the republic has had departed this life. The following list may be of interest in this con-

nection:	
President. Died.	2606
1, Washington Dec. 14, 1797	67
2. AdamsJuly 4, 1826	91
3. JeffersonJuly 4, 1826	828
4. Madison June 28, 1:35	945
5. MonroeJuly 4, 1831	39
6. Adams	91
7. Jackson June 8, 1845	18
8. Van DurenJuly 24, 1862	100
9. Harrison	150
10. Tyler Jan. 17, 1863	79
11. PolkJune 15, 1849	75.6
12. TaylorJu y 9, 1830	66
13. Filmore	7.4
14. Perce	65
15. Buchanan June 1, 1808	77
16, Lincoln April 14, 1865	56
17. Johnson July 31, 1875	67
True and a second second second second second	417

The oldest President at the time of his death was John Adams, and the youngest James K. Polk. Next to him was Abraham Lincoln, who was assassinated. The average age of the seventeen Presidents on their death was 721 years, and of the sixteen who died from natural causes 751 years.

That Pie.

"I will thank you for that pie," said a fellow boarder. "I was thinking who was King of Eugland when this old pie was baked, and it made me feel bad to know how long he has been dead."

Our landlady is a decent body, poor, and a widow, of course; cela va sans dire. She told me her story once; there was the wooing and the wedding, the start in life, the disappointment, the children she had buried, the dismantling of life; first of its luxuries, then of its comforts, the altered character of one on whom she had leaned, and at last the death that drew the black curtain between her and all earthly hopes.

I never laughed at my landlady, but I often cried, not those pattering tears that run off the leaves, but those which steal noiselessly through their conduits until they reach the cisterns lying round the heart, such I shed for her when the imps of the boarding-house inferno tugged at her soul with their red-hot pincers.

"Young man," I said, "the pastry you speak lightly of is not old, but courtesy to those who labor to serve us, especially if they are of the weaker sex, is very old, yet worth retaining."

A Sample of Military Instructions in

1776. An interesting relie of the Revolutionary war was recently found among some effects in the old Pelletreau homestead at Southampton, Suffolk county, R. I. It was a letter by Gen. Nathaniel Greene to Col. Josian Smith, which reads as follows:

Camp at Encorrance, Aug. 9, 1776.

State-Toclosed as a recolment of the Provincial Congress convering year to join my brigade. Immediately on the receipt of this you'll maren the process and are recommend immediately to this camp. You will make all possible expedition, as the enemy have embasted part, if not it, of the troops on State a island, and are making dispositions as if they intended to land here. You it send cut scouts and parties to get intelligence. If the unionly should make their landing good on any part of the beautiful and hear of your comment they may send out a party to intercept your march. Keep good from that and fear purels to prevent being environs.

To col. Joseph Smith, Long second. Camp at EBOOPLAND, Aug. 9, 1776. To col. Joseph Smith, Long Sista L.

Ecocution supplies the "funeral baked meats" of oratory.

Proper was hen for compliments do of treed long lines. They will get their be t bites in similow water.

A Sad Story of a Wrecked Life.

The most thrilling and sadly suggestive temperance lecture is the sight of a once noble, talented man, left in ruins by intoxicating drink, A Washington paper tells of a ragged beggar, well known in the streets of that city, who once held an important command in the army, having been promoted for personal bravery, from a cavalry Lieutenant to nearly the highest rank in military service. One night, not long ago, when he had been too successful in begging liquor to sate his craving, and while lying helpi saly drunk in the rear part of a Third street saloon, some men thought to play a joke on him by stealing his shirt, and proceeded to strip

Underneath his shirt, and suspended by a string from his neck, was a small canvas bag, which the men opened and found it contained his commission as Brevet Major Genaral, two congratulatory letters—one from Gen, Grant and one from President Lincoln—a photo-graph of a little girl, and a curl of hair -a "chestnut shadow" that doubtlessome day crept over the brow of some

When these things were discovered, even the half-drunken men who found them felt a respect for the man's former greatness, and pity for his fallen condition, and quietly returned the bag and its contents to where they found them, and replaced the sleeper's clothes

When a reporter tried to interview the man, and endeavored to learn something of his life in the past few years, he de

elined to communicate anything.

He cried like a child when told how his right name and former position were ascertained, and, with tears trickling

down his cheeks, said:

"For God's sake, sir, don't publish my degradation, or my name, at least, if you are determined to say something about it. It is enough that I know my-self how low I have become. Will you promise that much? It will do no good, all will do my friends a great deal of harm, as, unfortunately, they think I died in South America, where I went at the close of the war."

Intemperance and the gaming-table,

he said, had wrought his ruin.

Progress of Christianity.

The Rev. Dr. Dorchester delivered an address in Wesleyan Hall, Boston, on the progress of Christianity in the whole world, since 1500. Until the present century, says the lecturer, there was no trustworthy data of the world's popula-tion. Prior to 1830, it was variously estimated from 642,000,000 to 737,000,-000. In I850 it was reckoned at 1,000,000,000. Prof. Schem's estimate makes the present population 1,437,000,000. The progress of Christianity from the fourth or fifth century up to 1500 was confined almost entirely to Europe. The nominal Christians in the world in the third century numbered 5,000,000; up to the eighth century they had increased 30,000,000; in the tenta century, 50,000,000; in the fifteenth century, 100,000,000; in the last 300 years the increase has been 200,000,000, or as much as in the previous fifteen centuries. In 1880, there were 410,-900,000 nominal Christians. In 1500 there were 80,000,000 Catholics, 20,000,-900 Greek Christians and no Protestanty; in 1830, 116,000,000 Roman Catholies, 70,000,000 Greek Christians and 42,000,000 Protestants; in 1880, the respective numbers were 209,000,000, \$8,000,000 and 113,000,000, showing an increase of 80 per cent, umong the Papists, 26 per cent, in the Greek church and 176 smong the Protestants, The probable number of nominal Christcans in the world in the year 2000 was estimated by Dr. Dorchester at from 1,200,000,000 to 1,950,000,000. The populations living under Christian Govern-ments in 1500 numbered 100,000,000; in 1700, 155,000,000; 1830, 388,600,000; 1876, 685,000,000, divided as follows: Papal, 80,000,000 in 1500, 20,000,000 in 1700, 134,000,000 in 1830, 181,000,000 in 1876; Greek, 20,000,000in 1500, 33,000,-000 in 1700, 60.000,000 in 1830, 96,000,-000 in 1876; Protestant, none in 1500, 32,000,000 in 1700, 194,000,000 in 1830, 408,000,000 in 1876. Of the 52,000,000 square miles of the earth's surface, 32,-000,000 are under the control of Christian governments and 20,000,000 under Pagan and Mohammedan. Of the area under Christian domination 15,500,000 square miles are ruled by Protestant governments, 9,500,000 by Roman Catholic and 8,500,000 by the Greek church, In 1800 the Bible was printed in onefifth of the languages of the world; it is now printed in nine-tenths. Three million Bibles had been printed in 1800; 160,000,000 in from 200 to 250 languages and dialects have since been circulated. In the Sunday-schools in 1830 there were 2,000,000 officers, teachers and scholars;

Cotton Manufacturing in the South.

there are now over 14,000,000. In the

Protestant foreign missions in 1830 there

were 70,289 communicants; in 1850, 210,957; in 1880, 857,332. Adding those

at missions not reporting the aggregate would probably be 1,050,000 communi-cants and 2,500,000 hearers or adherents.

Of the 857,332 communicants £63,813

were formerly Pagan, and 193,449 Papal,

Jewish or Rationalistic.

Probably the one great industry in which the Southern man takes most interest, however, is the raising and manufacture of cotton. This is the royal plant that was the glory and wealth of the South in the past, and that is, no doubt, destined to work out its financial salvation in the future. By all the signs of the times, King Cotton has come to his own again. So profitable is the cottonmanufacturing business that in certain sections Northern capital goes begging, the home corporations having become wealthy enough to earry on the busi-ness. The culture of cotton is resumed, but with a difference. Instead of merely raising and solling the raw material Southern men see the policy of manu-facturing, both for home use and expect. They are filling their mills with the best Lowell-made machinery, and are already producing goods of excellent quality. They perceive the bad management of sending the raw fiber to New England to be manufactured and then buying it nack. The day is not far distant when the finest fabries will be manufactured in the South, and, in the meantime, the demand for what they already produce is so great that the milis have orders for all they can furnish for months to come, - Washington Post.

Nonsense.

A minister had a negro in his family, One Sunday, when he was preaching, he happened to look in the pew where the negro was, and could hardly contain himself as he saw the negro, who could not read or write a word, scribbling away most industriously. After meeting, he sold to the negro, "Tom, what you doing in church?" "Taking notes. nassa; all do gemmen take notes,"
'Being your notes here and let me see
hem." Tom brought his notes, which soked more like Chinese than English "Why, Tom, this is all nonsense." "I thought so, masse, all the time you was preaching it,"
